Technical Experience

Freelancer

WEB DEVELOPER, 2015 - Present

Symphesis: Full Stack Developer, Technical Manager
Symphesis is a browser based online music collaboration experience.
Built with **React** and **Express**, utilizing **Web Audio**, **getUserMedia** and **Socket.io**.

SenseiX: Lead Full Stack Developer
A practical Japanese language learning tool.
Built with JavaScript using **React** and **Express** framework / **MongoDB** platform.
Implemented spaced repetition algorithm and user authentication.

Jellylist: Lead Full Stack Developer
A browser app that allows users to share their wishlist with friends and family.
Built with **JavaScript** using **React**, **Redux** and **Express / MongoDB** project.

With over 10 years of web development experience, and a love for creativity, design and music, I want to contribute my passions and experiences into a team that creates beautiful, ground breaking experiences.

In my spare time, I enjoy playing the keyboard at a local venue with a live band and producing music.
